Burns, 7, 377–380

Index

Volume 1 1974-1975

A

Abdominal wall, scarred, child bearing in relation to, 167
Abston S.: *see* Larson D. L. jt. author
Adámková M.: *see* Doleček R. jt. author
Alam I.: *see* Karim K. jt. author
Alexander J. W.: *see* Lennard E. S. jt. author
Altemeier W. A.: *see* Fidler J. P. jt author
Antibacterial defence, improved, association in burn patients of, with nutritional support by oral route, 98
Applebaum J.: *see* Ben-Hur N. jt. author
Arturson G.: Association in burn patients of improved antibacterial support with nutritional support by the oral route, 98
Arturson G.: Oxygen affinity of whole blood *in vivo* and under standard conditions in patients with severe burns, 249
Association in burn patients of improved antibacterial support with nutritional support by the oral route, 98

B

Baar S.: Calcium exchange in thermally damaged red cells: a preliminary study, 163
Bailey B. N.: *see* Ho L. C. Y. jt. author
Baur P.: *see* Larson D. L. jt. author
Ben-Hur N. and Applebaum J.: The phosphorus burn and its specific treatment, 222
Ben-Hur N. and Soroff H. Combat burns in the 1973 October war and the anti-tank missile syndrome, 217
Běhounková E.: *see* Moserová J. jt. author
Birkhahn H. J.: *see* Monies-Chass I. jt. author
Black E. A.: Burn research in the USA: the center concept, 233
Blood transfusions in burn patients, some problems in, 160
Bohling C.: *see* Monafo W. W. jt. author
Bolkhovitinova L. A.: *see* Ivanova N. P. jt. author
Boyd W. C.: *see* Richardson G. L. jt. author
Brown R. F. R. and Kemble J. V. H.: Tetrazolium reductase as an index of viability of stored skin, 179
Browning F. S. C.: *see* Moores B. jt. author
Bukowska D.: *see* Nasiłowski W. jt. author
Burn(s) of bone: historical review and aetiology, 342; results of 98 cases and discussion of treatment, 356
  early excision of, 65
  eschar in children, ornithine-8-vasopressin in management of, 315
  injuries in children, socio-economic factors of, 145
  Injuries, International Society for, 281
  injury, respiratory responses to, 254
  of lower extremities, extensive and deep, skeletal suspension in complex treatment of, 291
  mechanisms of hypertrophic scar and contracture formation in, 119
  Pseudomonas aeruginosa infections in, 108
  psychological effects of, 70
  research in the USA: the center concept, 233
  and scalds, method of enquiry into the experience of children with, 142
  scars, newly healed, keratoacanthoma arising in, 172
  severe, early management of, 309
  wound healing, histological aspects of, 179
Burn-injured foot, moulded silicone shoe in prevention of contractures involving, 83
Bursztein S.: *see* Monies-Chass, I. jt. author

C

Calcium exchange in thermally damaged red cells: a preliminary study, 163
Capozzi A.: *see* Pennisi V. R. jt. author
de Castro A. B: *see* Valdés R. R. jt. author
Cataract, electric, 317
Catecholamines, effects of inappropriate action of, and counteraction, 47
Child-bearing in relation to the scarred abdominal wall from burns, 167
Chlumská A., Koníčková Z. and Moserová J.: Morphological changes in rat liver after burning, 272
Combat burns in the 1973 October war and the anti-tank missile syndrome, 217
Contracture(s) formation in burns, hypertrophic scar and, mechanisms of, 119
  involving burn-injured foot, moulded silicone shoe in prevention of, 83
Corticosteroid derivatives in the treatment of inhalation burns, 261
Craycraft T. K.: *see* Lennard E. S. jt. author

D

Davies J. W. L.: The fluid therapy given to 1027 patients during the first 48 hours after burning. I. Total fluids and colloid input, 319; II. The input of sodium and water and the tonicity of the therapy, 331
Débridement, study of the effectiveness of travase in, 274

Discriminant function analysis of 570 consecutive burns patients admitted to the Yorkshire Regional Burns Centre between 1966 and 1973, 135
Distribution and excretion of silver sulphadiazine applied to scalds in the pig, 57
Doleček R., Závada M., Adámková M. and Leikep K.: Endocrine responses in burned subjects: insulin, somatotrophin, renin, angiotensin 11, ACTH and LH, 43

E

Early excision of burns, 65
management of severe burns, 309
Editorial: 1, 97, 189, 281
Electric cataract, 317
Endocrine responses in burned subjects: insulin, somatotrophin, renin, angiotensin 11, ACTH and LH, 43
Endotoxaemia in severe burns, 269
Epstein R. A.: *see* Hishimoto K. jt. author
Excision, early, of burns, 65
laser, of thermal burns, 5
tangential, healing of burns after, 75
Extensive deep neck burns, 149

F

Feldman A. E., Thompson J. T. and MacMillan B. G.: The moulded silicone shoe in the prevention of contractures involving the burn-injured foot, 83
Fidler J. P., Rockwell R. J. jun., Siler V. E., MacMillan B. G. and Altemeier W. A.: Early laser excision of thermal burns in the white rat and miniature pig, 5
Fidler J. P.: *see* Hishimoto K. jt. author
5-fluorocytosine (flucytosine), results of using, in fungal infection in burn patients, 113
Fluid therapy during the first 48 hours after burning: fluid and colloid input, 319; sodium and water input and the tonicity of the therapy, 331
Fuchs R.: *see* Hunt T. K. jt. author
Fungal infection in burn patients: results of using 5-fluorocytosine (flucytosine), 113

G

Gastric dilatation, prolonged, as a complication of lightning injury, 175
Giuliani V.: *see* Seinfeld H. jt. author

H

Harii K., Ohmori K. and Ohmori S.: Utilization of free composite tissue transfer by microvascular anastomoses for the repair of burn deformities, 237
Hartford C. E.: *see* Richardson G. L. jt. author
Healing, perinecrotic zone in burns and its influence on, 197
of tangentially excised and grafted burns, 75
